Çağatay Demirbağ

Software Developer | DevOps Engineer

ABOUT ME

I am a Computer Engineering graduate from Karabük University. I focus on backend development using C# and .NET. I have experience in API development, service architectures, and building scalable web applications. I also work with technologies such as Linux, RabbitMQ, and Elasticsearch to develop solutions that improve system reliability and performance.

EDUCATION

KARABUK UNIVERSITY

Computer Engineering

2022 - Present

SKILLS

- **C#**
- **.NET**
- **SQL**
- **JAVASCRIPT**
- **HTML**
- **CSS**
- **WEB API**

WORK EXPERIENCE

The American Robert College
Junior .NET Developer
December 2023 to March 2024
ISTANBUL

I worked as a .NET Junior Developer in the project developed to make the registration processes of the Summer Camp at Robert College easier and more manageable. We developed a web application to modernize the existing registration processes. The project was built on the .NET platform and developed using ASP.NET MVC. Microsoft SQL Server was preferred for database management.

ACD | Veri Mühendisliği
Intern .NET Developer
July 2024 to August 2024
ESKISEHIR

Developed a web application for employee task management, including features for task assignment, approval, and email notifications. Gained hands-on experience with stored procedures, data visualization, and optimizing database operations. Contributed to improving workflow efficiency through automation and effective task tracking.

Medyasoft Bilişim Grubu
Intern .NET Developer
August 2025 to September2025
ISTANBUL

During my internship, I worked on RabbitMQ and Redis-based messaging and caching systems, contributed to the development and integration of the email delivery infrastructure, and actively supported various software development tasks within the company's projects.

Medyasoft IT Group
Junior .NET Developer
September 2025 - January 2026
ISTANBUL

Medyasoft IT Group
DevOps Engineer
January 2026 -
ISTANBUL
